

Task Assignment — Power BI Dashboard: Monthly Retail Trade Sales (StatCan Table 20-10-0056-01)

Objective: Build a second Power BI dashboard (6–8 visuals) — this is practice.

Data Source: The data can be sourced from the web-link given below:

[STATCAN Monthly Retail Data](#)

Business questions to answer:

1. How have total retail sales trended monthly/yearly from 2017 to mid-2026, and is there a visible seasonal pattern?
2. How does e-commerce retail sales compare to total retail sales over time — is e-commerce's share growing?
3. Which provinces/regions have the highest and lowest retail sales, and how does that ranking hold up over time?
4. Are there specific periods (e.g., 2020) where sales patterns broke from the norm, and how visible is that in adjusted vs. unadjusted data?
5. What's the most recent month's performance compared to the same month a year prior (true YoY, not cycle-over-cycle this time — you have real monthly data now)?
